

This is to be used as a guide rather than a set of definitive equivalences. Most data on doses is based on single dose studies so it is not necessarily applicable in chronic use, also individual patients metabolise different drugs at varying rates. The advice is always to calculate doses using Morphine as standard and to adjust them to suit the patient and the situation. Some of these doses have by necessity been rounded up or down to fit in with the preparations available.(Reproduced with kind permission of Margaret Gibbs, St Christopher's Hospice 2<sup>nd</sup> edition 2006)

DRUG	DRUG DOSE	APPROXIMATE CODEINE EQUIVALENCE	APPROXIMATE ORAL MORPHINE EQUIVALENCE
BuTrans 5	5 micrograms/hour	60mg/24 hours	10mg/ 24 hours
BuTrans 10	10 micrograms/hour	120mg/24 hours	20mg/ 24 hours
BuTrans 20	20 micrograms/hour	240mg/ 24 hours	40mg/ 24 hours
